DAR El Kotub

The Egyptian national library [Dar El Kotub] is considered the biggest library in Egypt and one of the largest in the world. It houses several million volumes with wide range of topics that represent a huge archive for humanity at large with Arabic and Eastern manuscripts preserved since antiquity. Dar El Kotub was built after a decree from Khedive Ismail in 1870 with an initiative from the educational iconic reformer Ali Pasha Mubarak minister of education at that time. The oldest governmental library contains Arabic papyri from different sites in Egypt dating back to the seventh century, wide variety of manuscripts of the Qur'an with some in the early-undotted Kufic script and more than 57,000 of the most valuable manuscripts in the world. Being aware of the human treasury before it, mohm was keen when furnishing the place to add the most developed ultimate modern styles, which facilitate the access and use of such documents for the researchers from all over the world.

Mohm used the spider counter that adds through its curvy shape elegance and modernity to the place with its Clerk chair that guaranteed the comfort and mobility through the wheeled spider-like legs.

Mohm designed the furniture in Dar El Kotub to suit the nature of the place; The reading tables are equipped with soundproof separating metal walls that save privacy and help in preventing the external noise which adds to the reader's concentration. For more comfort, the Egyptian leading furniture company paid especial care to the chair's back to help the reader indulge in his book for hours of comfort through the high back chair from mohm's Clerk chair collection. Containing thousands of documents and books, mohm provided its metal shelves with illuminator neon lamps that facilitate reading the books titles yet produce indirect light, which does not have any harmful effect on the readers' eyes.

The conference room's chairs were made to guarantee comfort through the sponge material and the woody armchairs. Moreover, the foldable chairs were designed especially to consume space and make corridors for the guests through arrival or departure.

GASCO

The Egyptian national Gas Company (Gasco) is considered the biggest gas company in Egypt owning two branches in Cairo and Alexandria. Gasco is responsible for the transportation and distribution of gas from the production field to consumers all over Egypt. The company is also responsible for separating the natural gas's highly economical components in order to use them in different industries with upgrading the control, communication and data transmission systems to international standards.

A company with such a high profile requires furniture that is up to the standards, a mission that mohm easily achieved. From the classic collection, mohm chose the high back and Low back chairs both with wheels for the head office. A small rounded meeting room was a necessity and to give a since of intimacy through breaking the formal rigid look of a working office, mohm added the super comfortable Chesterfield sofas to the company's lounge. As for the offices, the L shaped elegant desk was employed brilliantly with the drawer unit to consume space and provide the most possible facilities.

The meeting room for Gasco represents the core of the company where important discussions take place resulting in crucial decisions. mohm paid special care to such area through providing an elegant massive seven-meter meeting table designed to meet the gas company's criteria and it's meeting room's dimensions. The table is also equipped with holes that provide a place for the wires of the thirty-one internally plugged-in mikes.

BARCLAYS Bank

Being an active member of the international Barclays conglomerate, Barclays Bank in Egypt capitalizes on the expertise and empowerment of the global enterprise to offer high value and unique products and services across the Egyptian market. The British bank founded in 1836, employs through its branches in Egypt more than 2,000 people and serves more than 100,000 customers across the country through a network of over 60 branches and 93 in-branch and off-site ATMs. With such a huge number of employees and investments in the country, Barclays trusted Mohm the innovative furniture company to handle the task of furnishing Cairo's branch while Barclays concentrate on the finance.

Being aware that a desk for any accountant is his sincere companion all through the nine to five working hours if it did not exceed, Mohm designs for the desks made work a daily pleasure with the low back chair from the classic collection (color optional) and the long curvy table. Mohm was able to overcome the challenging narrow space of the branch compared to the number of employees through the three L shaped elegant desk used as one desk however, to keep the privacy the desks are provided with soundproof separating glass walls (material optional).

As being highly aware of a bank's requirements and needs, Mohm paid especial care to Barclay's clients; the visitor armless chair was a great choice from the Florida collection. As for the employee, L shaped elegant desk with drawer unit is ideal to allow an easy access to any required files while dealing with client.

CADBURY

With a history dating back to the nineteenth century, the renowned British chocolate company established by John Cadbury (1801-1889) in Birmingham, break boundaries to launch its branch here in Egypt for a wide scale of admirers to the delicious taste of the chocolate trademark. Cadbury started its journey in Egypt since 1991 with its first three products Cadbury Dairy Milk (CDM), Cadbury Dairy Milk Crisp and Cadbury Dairy Milk Hazelnut. No sooner, the company expanded it's business to target the middle class through acquiring BimBim the leading local confectionery business in Egypt established in 1977, then finally the unstoppable ambitious company acquired Adams (Incogum) where Cadbury Egypt Group Adams, Incogum started.

Such a success story requires cutting-edge elegance yet simple furniture to suit the business nature. The manager desk with a manager chair and two high back chairs from Florida collection epitomizes simplicity yet glamour along with the mirror surface locker. The small rounded meeting room along with five visitor chairs from the Florida chair collection was such an ideal choice to occupy the narrow space of the room. The workstation attached with a printer holder was provided with 80 mm separating partitions to give privacy and prevent noise in addition to an anti-scratch layer added to the desks. Being the face of the office, mohm was keen on designing an elegant and comforting reception through the Sienna 1-seat, and 2-seat couch.

The meeting room for lectures is far from ordinary; it can be used as either a meeting room by attaching the aluminum legged tables to one another or a working station with separate tables and low back chairs from mohm's classic collection.

BIBLIOTHECA

Alexandrina

The reconstruction of Bibliotheca Alexandrina was a national desire to revive the ancient glory of the old library lost in antiquity, which was built by orders from Ptolemy II of Egypt in the beginning of the third century BC. The library included about 700,000 books from all over the world with original handwriting. However, as nothing stops the stream of culture like war, the library was destroyed in the fighting between Ceasar and Ptolemy XII.

BIBLIOTHECA

Alexandrina

The revive of Bibliotheca Alexandrina (Library of Alexandria in Latin) goes back to 1989 when the Egyptian government announced the competition for a new design to the library to be constructed on the same ground of the ancient bibliotheca. The library's construction process took twenty years with the help of the UNESCO and a cost of 200 million dollars to be one of the biggest libraries and cultural centers in the world. Welcoming more than 800,000 visitors a year, the library includes a main reading room, conference center; specialized libraries for the blind, for young people and for children; three museums; four art galleries; a planetarium; and a manuscript restoration laboratory.

Such enormous project required furniture with a high quality and a great eye on details to match the dazzling sophisticated standards of the library which mohm handled through furnishing 90% of the whole library with customized pieces.

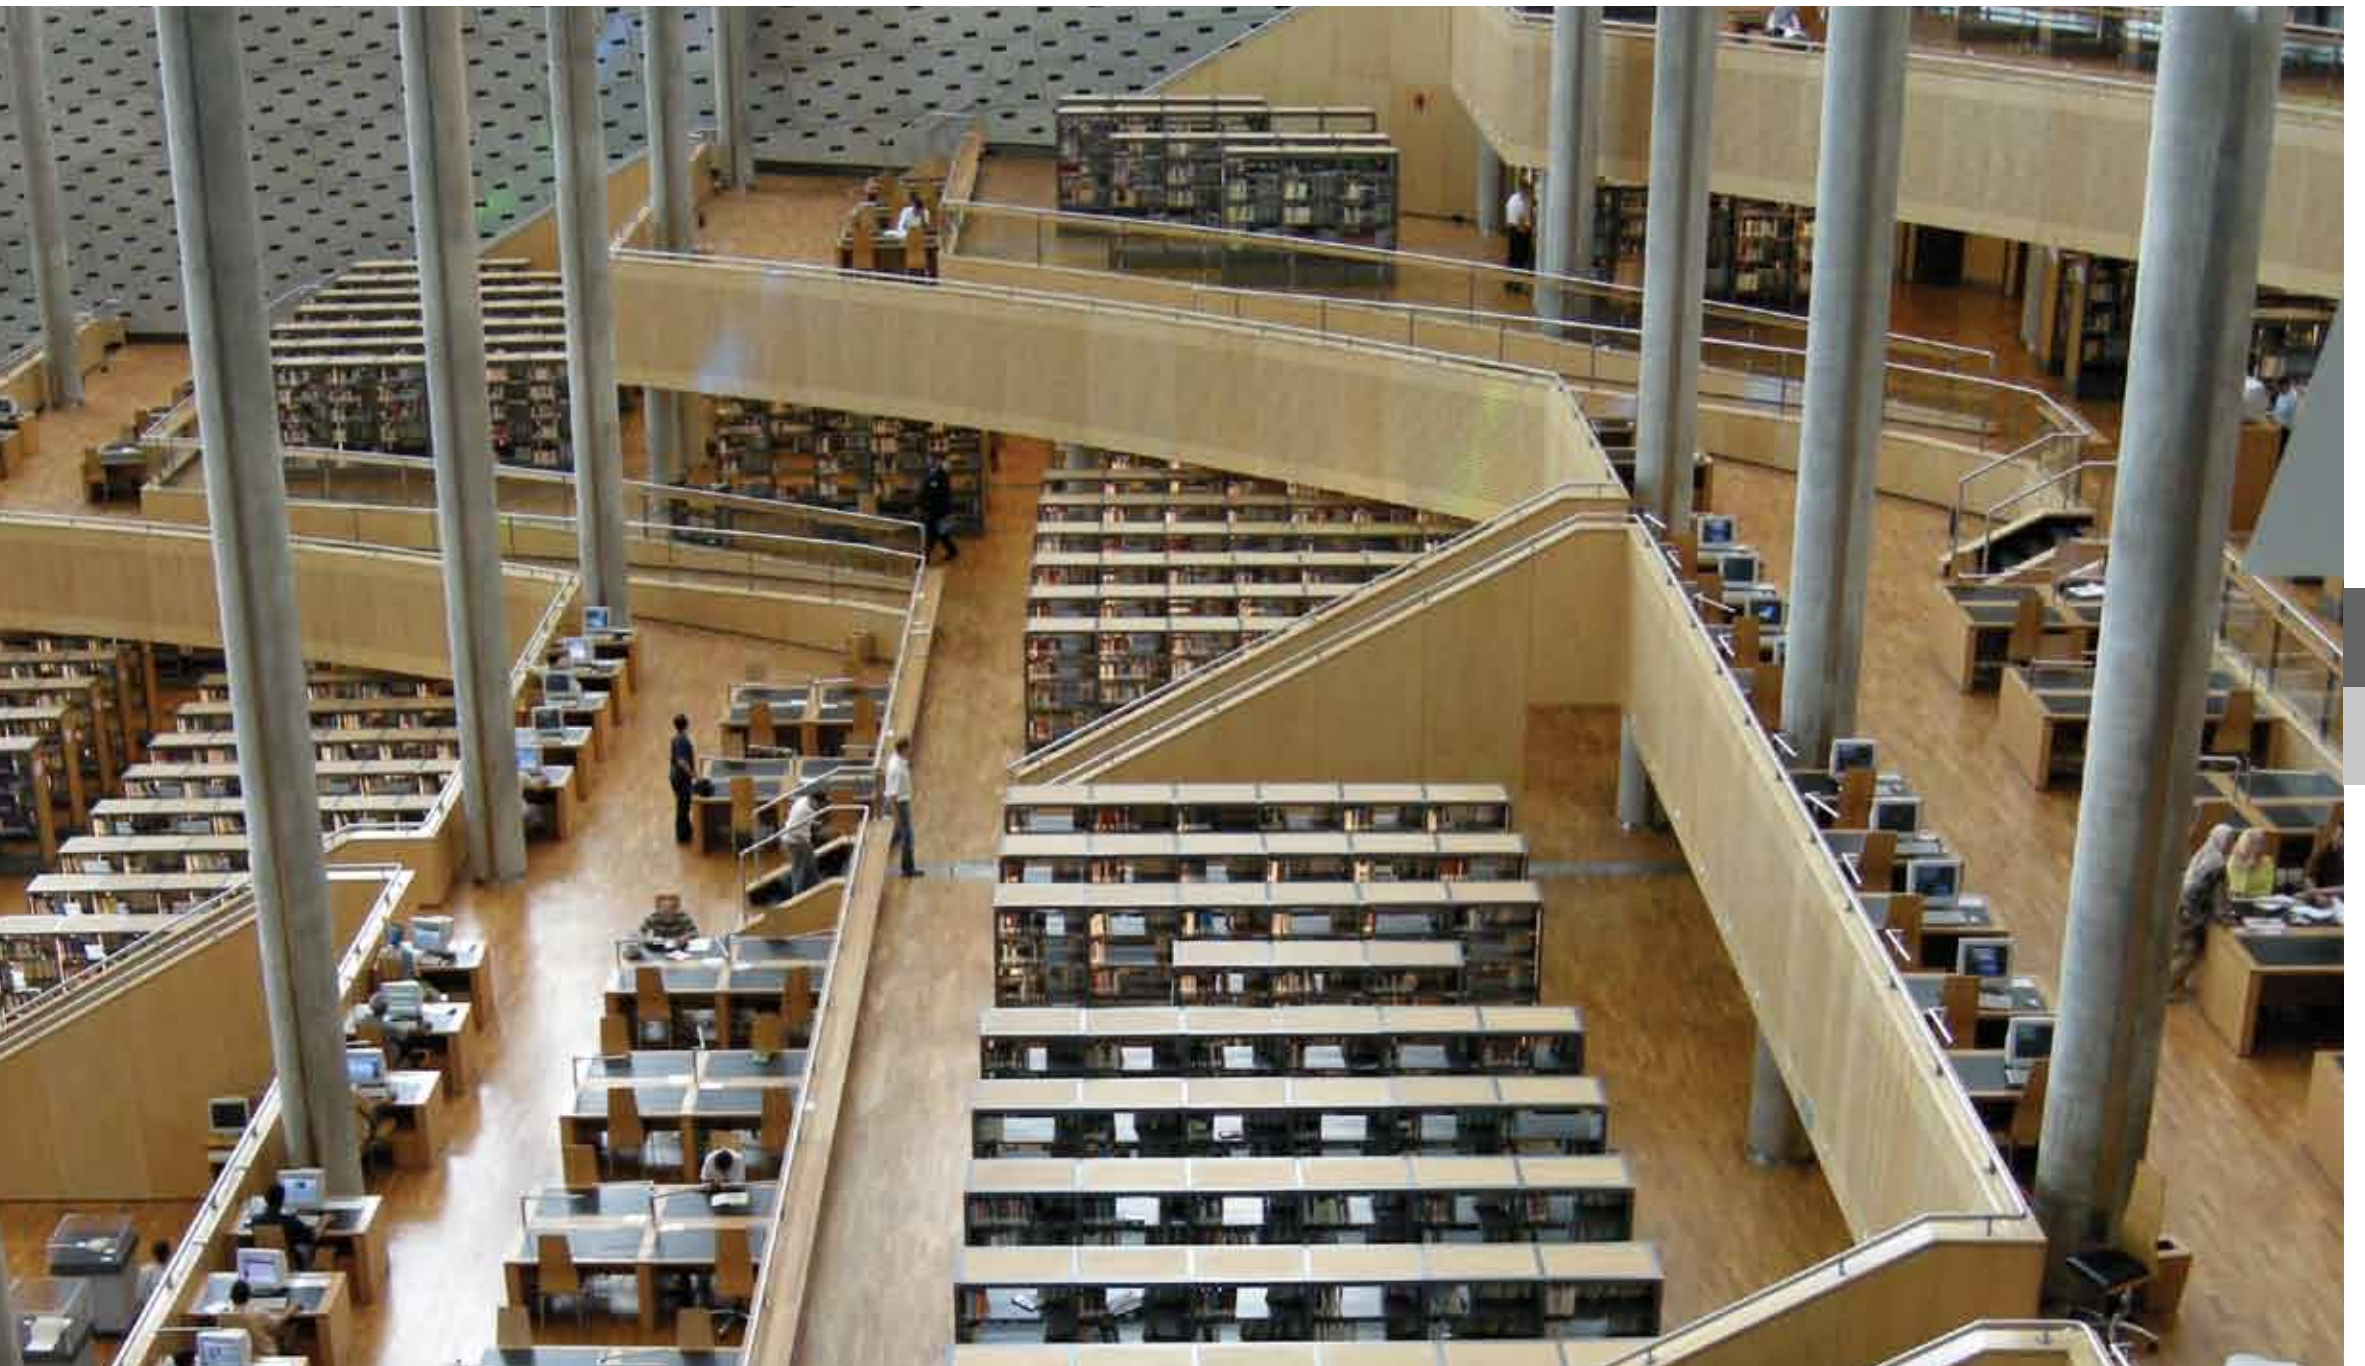

BIBLIOTHECA

Alexandrina

A library with a main reading room covering 70,000 m² on eleven cascading levels needed an exceptional form of design by mohm, a mission that the innovative furniture company accomplished easily. Setting the visitors comfort as its first priority, mohm designed chairs especially for the library to suit its enormous hall with a relaxing back seat. With a capacity of eight million books, the shelves design allows it to afford the marvelous treasures within which mohm made sure to emphasize through the neon lamps attached to the shelves for facilitating the browsing process. Being a cultural minaret for the world, mohm could not have missed the illumination factor in the library; the aluminum lamps attached to the reading tables that were designed specially in a zigzag shape to allow the reader to benefit as much as possible from the light.

THE MINISTRY OF Investment

The Ministry of Investment is the principle governmental authority concerned with regulating and facilitating investment, and stands ready to assist investors worldwide. It represents Egypt's sole "One Stop Shop" for investment, which aims at easing the way for investors worldwide to take advantage of the opportunities in Egypt's promising emerging market.

A company with such a vivid youthful spirit, which attempts to break the bureaucracy that complicates investments in Egypt, required practical yet elegant furniture. mohm put the Ministry of Investment profile into practice through it's 8cm thickness used as workstations with drawer unit from the M-Plus collection. Despite the highly practical and space consuming advantage of the workstations, privacy might be at risk; an obstacle that the innovative furniture company easily overcame through the soundproof separating wooden walls (material optional). Moreover, to keep the workstation even more practical and being aware of technology's major role in investment, mohm provided the partitions with electricity and telephone sockets. The Egyptian leading furniture company added to the workstation a unique sense of elegance through the glass separating walls where neon lamps were added to the glassy wall to give glamorous look when switched on as well as illumination.

THE FEDERATION of Egyptian Industries

The FEI was first established in 1922 and today it overlooks the operations and tackles the barriers facing the entire Industrial Sector. This is achieved through 16 dynamic, highly active Chambers and 19 Decision Support Committees that are constantly developing programs and services to facilitate and support the various industries within Egypt. mohm matched the FEI requirements through its cabinets and practical workstations provided with fabric designed partitions that can easily be used for sticking work papers and reminders as well as electronic and telephone sockets for computer uses and internet. Since mohm's notion of being practical never conflicts with elegance and ultimate style, the Egyptian leading company matched the partitions color with the Sphere Low Back chair to appeal to the employees.

Since first impressions last, mohm paid exceptional care when it comes to the FEI's reception office. The Spider Counter was an ideal choice with its curvy elegant look, which is one of mohm's latest collections.

THE AMERICAN University in Cairo

The AUC was founded in 1919 by Americans devoted to education and community service in the Middle East. Today, the University is the region's premier English-language university, an essential contributor to the social, political and cultural life of the Arab world. It also serves as a crossroads for the world's cultures: a vital, vibrant forum for reasoned argument, spirited debate and global understanding. For the ultimate comfort of the leading university's students, mohm provided newly developed Lockers for AUC, which kept the student's privacy and protected their items through its unbreakable locks. Moreover, the five-level full open cabinet provided unlimited capacity to the users.

As freedom of academic expression is fundamental to AUC in particular apart from any other university in Cairo, mohm paid special care when designing the lectures rooms where all the debates and progressive discussions are carried out. Through the Premium Metal Furniture line specially developed for AUC, the folded wheeled tables and chairs were the ideal solution, to maintain the youthful spirit of the place where the tables can be used as a huge meeting table or separate desks.

CREDIT AGRICOLE Bank

Credit Agricole is active in all segments of banking and finance, It is active in over 70 countries Egypt is one of them, with more than 160,000 employees, with such a huge number of employees and investments , CREDIT AGRICOLE trusted MOHM the innovative furniture company to handle the task of furnishing its branches . As being a highly aware of bank's requirements and needs, mohm paid exceptional care for credit agricole, by creating a new style counter made of metal sheets and wood with colors green & gray (color optional) to fit credit agricole environment and needs , as it ranked by retail banking revenues.

Being aware that a desk for any employee is his sincere companion all through the nine to five working hours if it did not exceed, so mohm designs for desks made work a daily pleasure, also desk is provided with a drawer unit ideal to allow an easy access to any required files while dealing with client, it is made of the same material of the desk (color optional), As for the employee need to save the important work files, mohm designed cabinets with a variety in dimension to fit all needs, it is made also of the same material and color.

SHOOTING Club

One of the most famous clubs in Egypt, also known as Nadi al-Seid, this vast complex offers a wide range of sports and recreational facilities. You will not be surprised to learn that it specializes in clay pigeon shooting but, if this is not your cup of tea, there are plenty of other sports you can indulge in. Soccer, swimming, martial arts, pool, ping pong, squash and tennis are just a few of the activities on offer. The fully equipped gym also offers an impressive range of facilities.

Also shooting club trusted Mohm the innovative furniture company to handle the task of furnishing its dressing rooms, so Mohm provided newly developed metal lockers painted in new colors (colors optional) used to protect users' private items from loss. Also Mohm paid exceptional care for Shooting Club by creating comfortable wooden benches, to fit the overall atmosphere of Shooting Club & to provide relaxation for its users.

DESIGN Concept

Since 1991 when the furniture company started, mohm took an oath to be the innovative contemporary Egyptian furniture company that matches universal standards. Such a progression was not an easy task; with the hard work of 1200 workers and high-tech machines along with 6 factories, mohm was able to engrave its name in the furniture business worldwide. To keep its leadership and important role in flourishing Egyptian furniture industry, mohm is always keen on keeping up with the latest designs and styles through its annual exhibition which reflects the company's latest collections.

The creative act, the defeat of habit by
originality, overcomes everything.

“ Principles for the
Development of a
Complete Mind:
Study the science of art.
Study the art of science.
Develop your senses
especially learn how
to think. Realize that
everything connects to
everything else.”

mohm
FURNITURE INNOVATION

DESIGN Concept

The new Novalinea Desk collection from mohm is a modern yet relaxing collection. The Elegant in Style collection from mohm sums up the company's philosophy towards design, the high back white chair along with the decorated partition gives a classy look that appeal to the eye. A must-have piece of furniture in any office's lounge is the super comforting Hamburg sofa with two seats that is available in black and white.

DESIGN Concept

With an impressive list of foreign clients that include French, Italian, British and German companies, mohm presents through its new collection variety of meeting tables that suit any taste and meet wide range of requirements. The Meeting Table from Novalinea collection affords more than eight Sphere low back chairs in addition to the simple yet elegant open cabinet from the Novalinea collection.

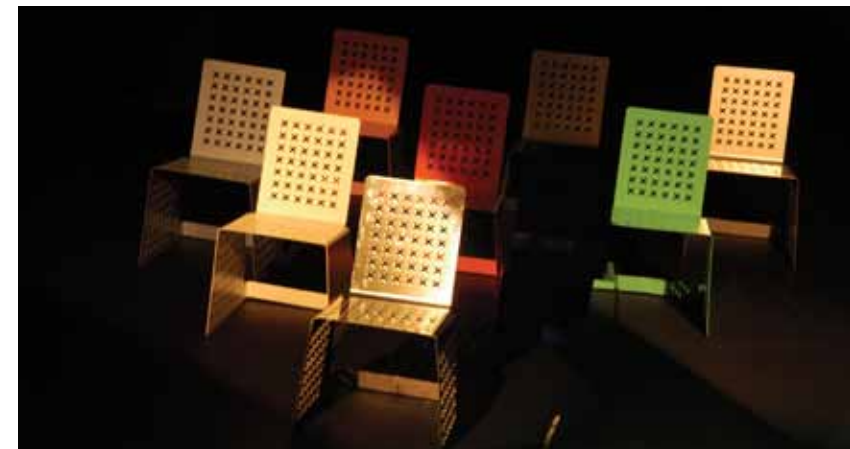

KARIM Rashid

Karim Rashid is one of the most prolific designers of his generation. Over 3000 designs in production, over 300 awards and working in over 35 countries attest to Karim's legend of design. The Egyptian born artist's award-winning designs include democratic objects such as the ubiquitous Garbo waste can and Oh Chair for Umbra, interiors such as the Morimoto restaurant, Philadelphia and Semiramis hotel, Athens and exhibitions for Deutsche Bank and Audi. The New York based designer has collaborated with clients to create democratic designs (Rashid believes that high-quality design should be accessible to the masses) for Method and Dirt Devil, furniture for Artemide and Magis, brand identity for Citibank and Hyundai, high tech products for LaCie and Samsung, and luxury goods for Veuve Clicquot and Swarovski. Karim's work is featured in 20 permanent collections and he exhibits art in galleries worldwide.

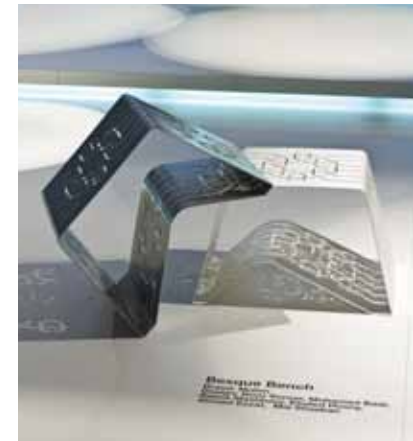

As both mohm and Karim Rashid share the same vision of an innovative sense of style and modernity, Karim Rashid cooperated with mohm to release the most modern functional and holistic furniture line.

mohm at Milan Furniture Fair

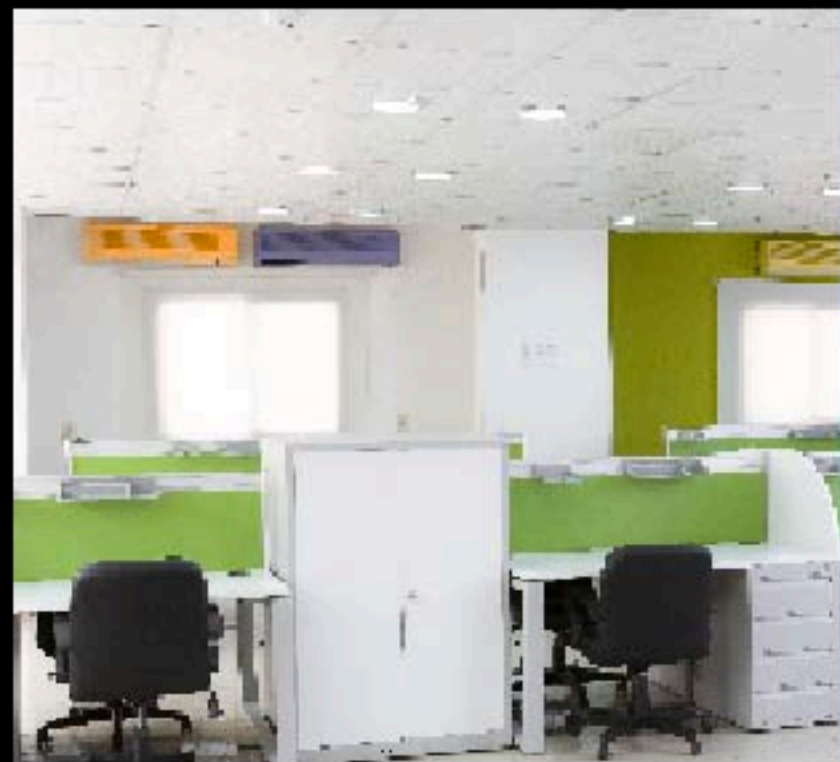

The Salone Internazionale del Mobile di Milano was launched for the first time in 1961 by a small coalition of furniture manufacturers, from within the Federlegno-Arredo trade association, with the aim of promoting the exportation of Italian furniture, and which soon became the most prestigious international event in the world of furniture design and production. As one of the leading furniture companies in the Middle East, mohm is always keen on sharing in the fair with the latest trendy designs. Sun Stool and Table by Hary & Camila is a multifunction stackable object, low chair, side tables and for stocking objects under the removable shell, inspired by the movement of the sun and its relation between the cosmos and pyramids, which is endless. Besque Bench is a bench full of character, excitement and mystery, by trying to follow the way the sunlight plays with the object and its shadow, revealing new aspects from every angle. The Taktouka Table designed by Karim Mekhtigian was an interpretation of the popular local icon of Egyptian coffee shop table for mohm. In the design inspired by this local icon, the Taktouka Table is using a basic material like metal in a design featuring intricate details. Profile Table by Shinichiro Ogata was designed with overlapping silhouettes that symbolize religion and culture from ancient to present ages that are used under a layer concept. The table's legs faithfully express the rich accumulation of history through the multiple layers it possesses.

OFFICE

Soft Line

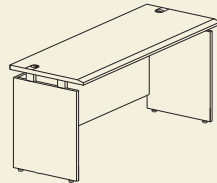

The Office Soft Line from mohm depicts the company's vision in breaking the norms of a typical traditional office with the simple yet modern designs of the line. The line's series contains multiple pieces that meet the client's requirements regardless of his business nature or office's space. The L-return Desk provides storage capacity for its desk and cabinet combination where a drawer unit can be added. The printer desk with its modular style is capable of dealing with any kind of printers through its flexible design. As for the Storage Cabinet in the soft line collection, it is one of the line's most distinguishing pieces where the collection provides wide range of drawers and cabinets with customized sizes and functionality.

OFFICE

Elegant Line

mohm is keen through it's various range of collections to satisfy and match the market requirements through manipulating different materials. In the Elegant collection, mohm has ecexcelled in creating a complete cabling solutions. Moreover, it perfectly matches conventional private offices to achieve a cohesive appearance. The desk's durable metal legs can facilitate station design. As for the side desks, it can match easily the taste of clients who seek simplicity and practical pieces. The desk's laminate surface is quite durable to scratching & acids as well as heat.

OFFICE

Spider Line

The thing that distinguishes this line from mohm the usage of aluminum and wood, the main reason behind the collection's name is the aluminum spider-like legs. The Standard desk from the spider collection is an ideal choice for a company's manager with its large surface and four drawers arranged from smaller to bigger sizes for a more practical usage. The thing that distinguishes the Spider collection workstation from any other one of mohm's collection is the aperture aluminum partitions, which gives the client the freedom to add hanging shelves or other accessories to free-up the valuable desk space. The Filing Cabinet is a perfect choice for any office as it is a three-in-one piece for multi uses (shelf, drawer and cabinet). The Curvy Reception Counter is the most innovative piece of the Spider collection, its dazzling luxurious front hides the practical side of the counter with two internal work tops standing on elegant slim aluminum legs. The spider collection never ceases to puzzle the client with its variety of furniture pieces; the Puzzle meeting table is one of mohm's latest designs with its trendy practical puzzle pieces design.

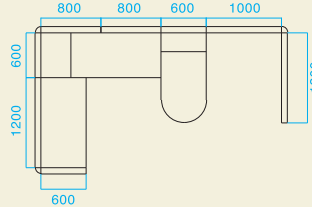

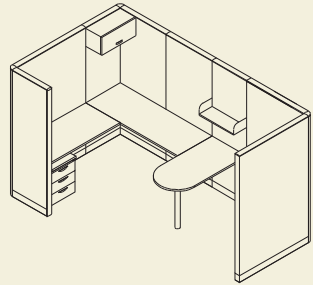

OFFICE Partition Line

The Partition Line from mohm depicts the ultimate freedom of designs for the clients. It gives flexibility to adjust the partition in accordance to one's own requirements and free space. The panels and the hanging systems are modular, non-progressive and simple to reconfigure while setting new standards for visual appeal. The system fully integrates with open plan furniture. The partition system provides an array of architectural features and design possibilities required for the private office. Steel work surface supports have no load restrictions under normal use. A variety of cladding materials are available in multiple colors for laminates, textiles, glass & embossed metal that is considered one of our special features.

OFFICE

Infinity Pro

Finally using simple elements and colors to individualize corporate concepts, Infinity is a new line that raises brows and makes room for reflection and meditation. Infinity is a blend of mysticism and practicality.

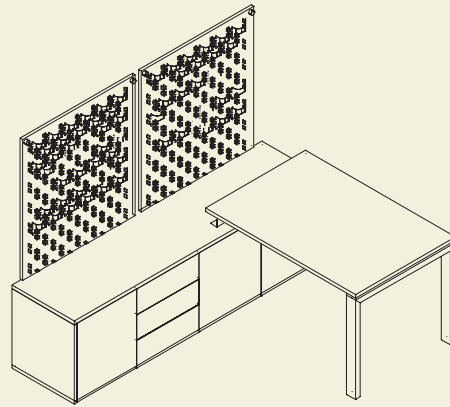

The entangled steel background takes a new route in design and manufacturing that rebel against monotonous classicism. The tables allows for myriad sets of arrangement. A grey, white and black harmony invites an assortment of matching colors and accessories to lighten up the business mood. The cabinets are made to accentuate the infinite flexibility of the line.

EXECUTIVE NOVALINEA

Mohm specialized by its nice and luxurious office which gives a very relaxing and enjoyable atmosphere to work in day in and day out. There is nothing better than a tall and deep desk chair and a wide desk to make for a comfortable but also NOVALINEA office look and feel. Although many people don't think often about their office furniture, for those people who work at home, the office is the most important room in the house. Take advantage of this room and create a room of success and luxury with MOHM'S office pieces.

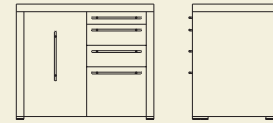

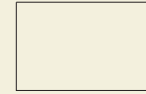

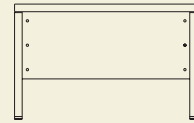

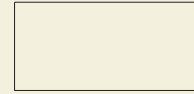

NOVALINEA Top, Side, Front panel & Legs is made of MDF, covered with laminated natural oak veneer, the NOVALINEA structure is made of beech, Painted with polyurethane painting.

EXECUTIVE ITALIAN

What is so different about MOHM office furniture compared to other types of it? One's work place, the area where people unfortunately (or is it fortunately) spend the most of their time is equipped with such type of furniture. This is why one should equip his or her office in such a way that one feels comfortable in it but also in a way that the interior would stimulate one's working performances.

When choosing items of interior for your working place, you should accord to the rhythm of your working day and the position you're in. Boss' armchair is the indicator of one's status and also an indicator of how successful the whole organization is. Therefore a rich and prosperous decoration would indicate one's high position whereas a plain office table would reveal a rather low status of its owner.

OFFICE Fly System

MOM's avant-guardist FLY line goes with in harmony with the vivid retro 1960s and 1970s designs of interior design that came back with the new millennium. We are confident that the overwhelming youthful spirit of thriving executives goes perfectly with designs that hover around office spaces with creativity and originality. Smoothly, MOHM's FLY line could draw us into the revolutionary spirit of the 1960s, making the best of its practicality without giving up an inch of its texture, perspective and volume. The top boasts of its light colour to bring a striking contrast with the dark (mostly black) rich leather armchairs together with the steel table legs. The centre of the table is in glass to add light and glow to the surface.

The bookcase is a gripping model that takes a new route in design and manufacture. It builds on the unexpected and seemingly unfinished lines of its center part that tops a solid cabin to add to its contrasting concepts. With FLY, MOHM takes off a rugged path to bring a twin professional and artistic look to its home and office spaces.

Egypt has the largest overall education system in the Middle East and North Africa(MENA) and it has grown rapidly since the early 1990s. Some schools in Egypt trusted MOHM the innovative furniture company to handle the task of furnishing it, so mohm designed suitable benches with a variety in dimensions to fit all edges (colors optional) and also lab tables.
